OE-A Fellow 2020 appointed

Bertrand Fillon, CEA-Liten is honored with the title of OE-A Fellow.

Frankfurt, Germany, October 21, 2020– Since 2017 the OE-A honors persons who have made special contributions to the further development of the flexible, organic and printed electronics industry and the OE-A (Organic and Printed Electronics Association) - a working group of the VDMA. With the appointment as 'OE-A Fellow' a personal OE-A membership for life is connected.

This year, the OE-A Board has chosen Dr. Bertrand Fillon, Program Director of the CEA-Liten of France. The fellow certificate was digitally handed over by Stan Farnsworth, Chair of the OE-A Board and Chief Marketing Officer of NovaCentrix, during the online OE-A meeting.

"Dr Fillon has made great contributions to both the OE-A and LOPEC, the international exhibition and conference for the printed electronics industry," said Farnsworth. "For more than fifteen years, Bertrand Fillon has been an important ambassador for the OE-A and has contributed significantly to fostering the very good and ever-increasing cooperation with French companies and networks", Farnsworth added.

Bertrand Fillon has also supported and promoted the flexible, organic and printed electronics industry at European and international level. Bertrand Fillon is also a member of the Scientific Board of the LOPEC conference. He is also involved in various European platforms and associations as well as in various expert groups at international and national level.

"The OE-A would like to thank Dr Fillon for his services to the printed electronics industry, his support of the OE-A, and his work in establishing networked communities of both

research and business in France and throughout Europe ," continued Farnsworth. "We look forward to continuing our collaboration".

Organic and Printed Electronics Association

The OE-A (Organic and Printed Electronics Association) was founded in December 2004 and is the leading international industry association for organic and printed electronics. The OE-A represents the entire value chain of this emerging industry. Our members are world-class global companies and institutions, ranging from R&D institutes, mechanical engineering companies and material suppliers to producers and end-users.

Well over 200 companies from Europe, Asia, North America, South America, Africa and Oceania are working together to promote the establishment of a competitive production infrastructure for organic and printed electronics.

The vision of the OE-A is to build a bridge between science, technology and application. The OE-A is a working group within VDMA. More than 3,100 member companies from the engineering industry make VDMA the largest industry association in Europe.

Organic and printed electronics

Organic and printed electronics stands for a revolutionary new type of electronics: they are thin, lightweight, flexible, robust and produced at low cost. It enables new applications, including single-use devices enabling ubiquitous electronics.

LOPEC

The OE-A and Messe München are the hosts of LOPEC, the premier international exhibition and conference for the printed electronics industry. It addresses end-users, engineers, scientists, manufacturers, and investors. LOPEC 2021 will be held March 23rd to 25th, 2020 at Messe München, Germany.
